

Your operator interface has changed. Forever.

Mobility

Monitor systems at remote installations. Test equipment on the spot. Carry the data you need with you. Receive email or text notifications.

See and control multiple manufacturers' systems in the same app.

Securely view your interface on the free *groov* View app for iOS or Android. Or on any brand mobile device with a web browser.

Simplicity

Build your mobile interface on any computer with a web browser. No plugins; no extra software.

Drag and drop indicators and controls onto the screen, then tag them. No coding or programming. No tag limits.

Authorize users and passwords. No user limits. No user or device keys.

Deploy automatically. Just refresh your screen.

Connectivity

Add Modbus/TCP devices and Opto 22 SNAP PACs to your interface without intermediary servers or protocol converters.

With an OPC UA server, easily add Allen-Bradley, Omron, Mitsubishi, Siemens, and many more systems and equipment to your interface.

Your system on your mobile.™

What would you like to view or control from your smartphone or tablet?
Machine status? Device levels? Factory production? Key performance indicators?

Now you can—with no programming. No tag limits. No user or device keys.

Easily build your mobile operator interface. Just drag and drop from a library of indicators, trends, and controls, then connect to tags in your system.

Include Modbus/TCP devices, Opto 22 SNAP PACs, and OPC UA-compliant systems and equipment.

Log events and notify technicians via email or text message.

Securely monitor and control on smartphones, tablets, laptops, PCs—from anywhere, anytime you need to. It's mobile made simple.

Choose any mobile device you wish, including iOS, Android, Windows, and more.

Use the free *groov* View app for iOS and Android, or your device's web browser.

Compatible with:

Put your system on your mobile today.

Choose your *groov*:
groov Box—tough, compact, plug-and-play appliance
groov Server for Windows—PC-based software version

Designed, manufactured, and supported in the U.S.A.
Free product support

Get the free *groov* View app

Use any computer with a web browser to build your app.

Changes are saved to *groov*, and mobile devices are automatically updated.
